

What are some "other imports"?

Can anyone name some of the "other imports" that haven't already been mentioned? Off the top of my head I can think of the Lamborghini, and Bentley (unless that has been mentioned elsewhere).

The Datsun 620 has not been mentioned, I think. It's an old Japanese pickup truck, very stylish. The Datsun Roader was also a nice model.

Wow, I haven't seen those models in ages! I used to have a poster of a classic Datsun car on my wall as I grew up but that's the closest I got to one so far.

Hate to say it, but now that I think of it, is Datsun even around anymore? I see them on the road sometimes, but what ever happened to them, did they get bought out by Nissan?
